

```
c_parser_frontend::  
type_system::TypeSystem  
::GetType
```

A diagram illustrating a transformation or mapping between two code snippets. On the left, a gray rectangular box contains the code for a `GetType` method. A blue arrow points from this box to a white rectangular box on the right, which contains the code for a `GetTypeNameToNode` method. Both boxes have a black border and contain the same initial code: `c_parser_frontend::`, `type_system::TypeSystem`, and `::`. The final line of code in each box is the method name.

```
c_parser_frontend::  
type_system::TypeSystem  
::GetTypeNameToNode
```
