The diagram illustrates a mapping from three distinct source identifiers to a single target identifier. On the left, three white rectangular boxes are stacked vertically. Each box contains a C++-style namespace and identifier. Blue arrows originate from the right side of each of these three boxes and point towards a single, larger gray rectangular box on the right. This gray box also contains a C++-style namespace and identifier. The arrows indicate that the three source identifiers are associated with or mapped to the single target identifier.
